

KENDALL ANGULO JHONSON

UNITY GAMEPLAY & SYSTEMS DEVELOPER

Technical Artist | Project Lead

Costa Rica (UTC-6) | Available for remote contracts

kendarte@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Unity gameplay and systems developer with 8+ years of experience building combat, RPG, AI, camera, cinematic and interaction systems. Brings 15+ years in 3D production and animation, combining C# development with technical art, integration, debugging and project leadership. Experienced in turning design concepts and third-party frameworks into stable, playable prototypes.

CORE COMPETENCIES

GAMEPLAY SYSTEMS
Combat, RPG, abilities and state logic

UNITY INTEGRATION
AI, animation, dialogue and frameworks

CAMERAS & CINEMATICS
Dynamic cameras, sequencing and lip-sync

TECHNICAL ART
3D, rigging, animation and optimization

PROTOTYPING
Playable vertical slices and iteration

DEBUGGING
Stabilization, collision and impact handling

LEADERSHIP
Technical direction and coordination

TOOLS
Custom workflows and production automation

PROFESSIONAL EXPERIENCE

Shampoo Arcade | 2015 - Present

Unity Gameplay & Systems Developer / Project Lead

- Build and maintain combat systems, RPG statistics, abilities, state logic, collision and impact handling, dynamic cameras, cinematics and playable Unity prototypes.
- Create custom coordination layers around character controllers, enemy AI, animation, dialogue, lip-sync and third-party Unity frameworks.
- Lead technical implementation, debugging, documentation, creative direction and collaborator coordination.

Instituto Santa Gráfica | 2026 - Present

Unity 3D Instructor

- Teach Unity programming, gameplay development and real-time environment production.

Stepico | 2023 - 2024

3D Modeler

- Created and optimized 3D characters and assets for premium game productions and Unity environments.

Q-Games | 2020 - 2023

3D Modeler

- Produced game-ready characters and assets within multidisciplinary game-development teams.

Freelance | 2015 - 2020

3D Asset Artist / Unity 3D Designer

- Modeled and prepared props and 3D assets for integration in Unity.

Estudio Flex Animación | 2010 - 2011

Character Animator

- Produced character animation and 3D environments for animated and interactive projects.

KENDALL ANGULO JHONSON

UNITY GAMEPLAY & SYSTEMS DEVELOPER

SELECTED TECHNICAL PROJECTS

Turbo 9X | Action RPG | Formerly Taek-Won-Cop

- Extended and integrated combat, RPG statistics, timing, collision, status, reaction, lip-sync and cinematic systems through custom gameplay coordination layers. Selected for Ingenia Lab Zapopan in 2026.

Horse Racer | Racing simulator

- Built a deterministic 1v1 race simulation for 10 horses, covering 45 pairings, 7 result types and 315 precomputed configurations, with a dynamic virtual camera director.

Euclid Wars | First-person narrative prototype

- Implemented first-person locomotion and camera control, exploration, selectable dialogue, objective feedback, menus and multi-scene narrative progression.

TECHNICAL SKILLS

Unity Development: Unity, C#, gameplay architecture, combat systems, RPG systems, state logic, collision handling, cameras and debugging

Integration & AI: Invector, Adventure Creator, Mecanim, enemy AI, animation, dialogue and third-party framework integration

Technical Art: Blender, Maya, DAZ Studio, Photoshop, modeling, rigging, animation and optimization

Additional Tools: HLSL, FMOD, Wwise, Unreal Engine and Godot

EDUCATION

ULACIT | 2013 - 2019

Bachelor's degree

CETAV | 2013 - 2015

Animation for Animated Short Films

RECOGNITION

- Selected for Ingenia Lab Zapopan | 2026
- GDC Scholarship Recipient | 2019
