KENDALL ANGULO JHONSON

UNITY GAMEPLAY & SYSTEMS DEVELOPER | C# PROGRAMMER

Costa Rica (UTC-6) | Available for remote contracts | kendarte@gmail.com
Portfolio | GitHub | LinkedIn

PROFILE

Unity/C# developer with 8+ years of experience building combat systems, gameplay state coordination, cinematic cameras, editor tools and playable prototypes. Combines systems programming with 15+ years of 3D and animation production experience.

SELECTED UNITY WORK | WORKING BUILDS + CODE SAMPLES

Taek-Won-Cop | **Third-person action RPG**

Custom combat and targeting layers covering attack arbitration, skills, defense, status effects and temporary control handoffs. Cinematic Director coordinates cameras, actor actions, dialogue and animation through Unity and third-party framework integrations.

Gameplay / technical case study | C# source excerpts | PC build

Horse Racer | **Simulation and production automation**

Programmed deterministic 1v1 race orchestration for 10 horses, 45 unique pairings and 7 outcome types (315 configurations). Implemented duration-driven movement, cinematic camera direction, edit-mode track tools and automated Unity Recorder batching.

Windows demo | Case study and video | C# code samples

PROFESSIONAL EXPERIENCE

Shampoo Arcade | **Unity Gameplay & Systems Developer / Project Lead | 2015-present**

Unity/C# gameplay programming, system integration, cameras, animation and prototype debugging. Built original combat and cinematic coordination systems and maintained interactive demos.

Instituto Santa Gráfica | **Unity 3D Instructor | 2026-present**

Teach Unity programming, gameplay development and interactive environment production.

Stepico | **3D Modeler | 2023-2024**

Created and optimized characters and game-ready 3D assets for real-time production.

Q-Games | **3D Modeler | 2020-2023**

Produced 3D characters and assets in a multidisciplinary game-development environment.

Earlier work | **Freelance 3D Asset Artist (2015-2020); Estudio Flex, Character Animator (2010-2011)**

TECHNICAL SKILLS

Unity / C#: combat and RPG systems, abilities, AI coordination, character and camera control, scene state, editor tooling, debugging.

Integration: Invector, Adventure Creator, Mecanim, Koreographer, SALSA; gameplay/animation/dialogue coordination.

Technical art: Maya, Blender, 3D modeling, rigging, animation and real-time asset optimization.

EDUCATION & RECOGNITION

ULACIT (2013-2019) - Bachelor's degree | **CETAV** (2013-2015) - Animation for Animated Short Films

GDC Scholarship Recipient (2019) | Selected for Ingenia Lab Zapopan (2026) | Spanish: Native, English: Advanced
